### **Dimplex Thermal Solutions Gears up for IMTS Showing**

KALAMAZOO—Dimplex Thermal Solutions (DTS) is pleased to announce its participation in the 2016 International Manufacturing Technology Show on Sept. 12-17 in Chicago. Also known as IMTS, the show is held annually at McCormick Place.

“The IMTS show is yet another opportunity for us to show the manufacturing industry what DTS, our parent company, and our premier brands can offer in the realm of custom thermal management solutions,” said Tim True, Director of Sales and Service for DTS.

“We are the U.S.-based subsidiary of the Glen Dimplex Group, the world’s largest electrical heating and process chillers manufacturer. The Glen Dimplex Group holds significant global market positions in domestic appliances, cooling, ventilation, and renewable energy solutions. Being a part of this group has allowed us to expand our product offerings and given us a worldwide edge while maintaining a local focus and dedication to service,” he said.

Known for its application expertise in process cooling, designing reliable chillers, and standing behind its products, DTS is a service organization with strong coverage within the U.S. and overseas that enables customers to reduce their downtime. The company is known for its Koolant Koolers brand for standard and custom industrial and medical chillers and its Riedel brand for precision laser chillers.

Show attendees are invited to visit DTS in booth N-6062 where a sample chiller will be set up. The unit features many of the company’s customizable options.

Representatives will be available to explain how these features and others can be used to create thermal management solutions from Dimplex Thermal Solutions.

For more information about Dimplex Thermal Solutions’ participation in the IMTS show, visit [www.dimplexthermal.com](http://www.dimplexthermal.com) or call 800-968-5665. To learn more about the design,
