

PROTECT YOUR INVESTMENT with **K-KOOL-E**

Inhibited Ethylene Glycol for HVAC/R Systems

K-KOOL-E, industrially inhibited ethylene glycol, is custom formulated for use in HVAC/R Systems and available exclusively from Koolant Coolers.

- Operating range of -60°F to 250°F
- Excellent buffering characteristics
- Protects brass, copper, copper alloys, steel, cast iron and aluminum
- Neutralizes corrosive acids while providing fluid stability

K-KOOL-E is available for shipment today in 5 gallon disposable pails. Premixed concentrations, larger quantities or propylene glycol is also available through the factory.
