

OEM Process.

A global network, a proven process, and nearly 70 years experience providing world class solutions. Put our experience to work for you.

Our customized OEM designs start with listening to you as our partner. An innovative solution is only successful if the application requirements and challenges are understood. From first contact to full production, GDTS will be there to ensure that your customized product is commissioned accurately and delivers to specification. Our unparalleled 24/7 global service then accompanies the unit through the 18 month parts/labor warranty through the life of the chiller.

We do it all.

- Multiple circuits?
- Modular for growth?
- Freeze protection?
- Complex fluids?
- Tight tolerance?
- Low temperature?
- Added heating circuit?

No problem.

We have the solution.
